

Cartoon & Stylized HDRI sky Pack 01

First at all - Thank you for your purchase my work, I really appreciate this!

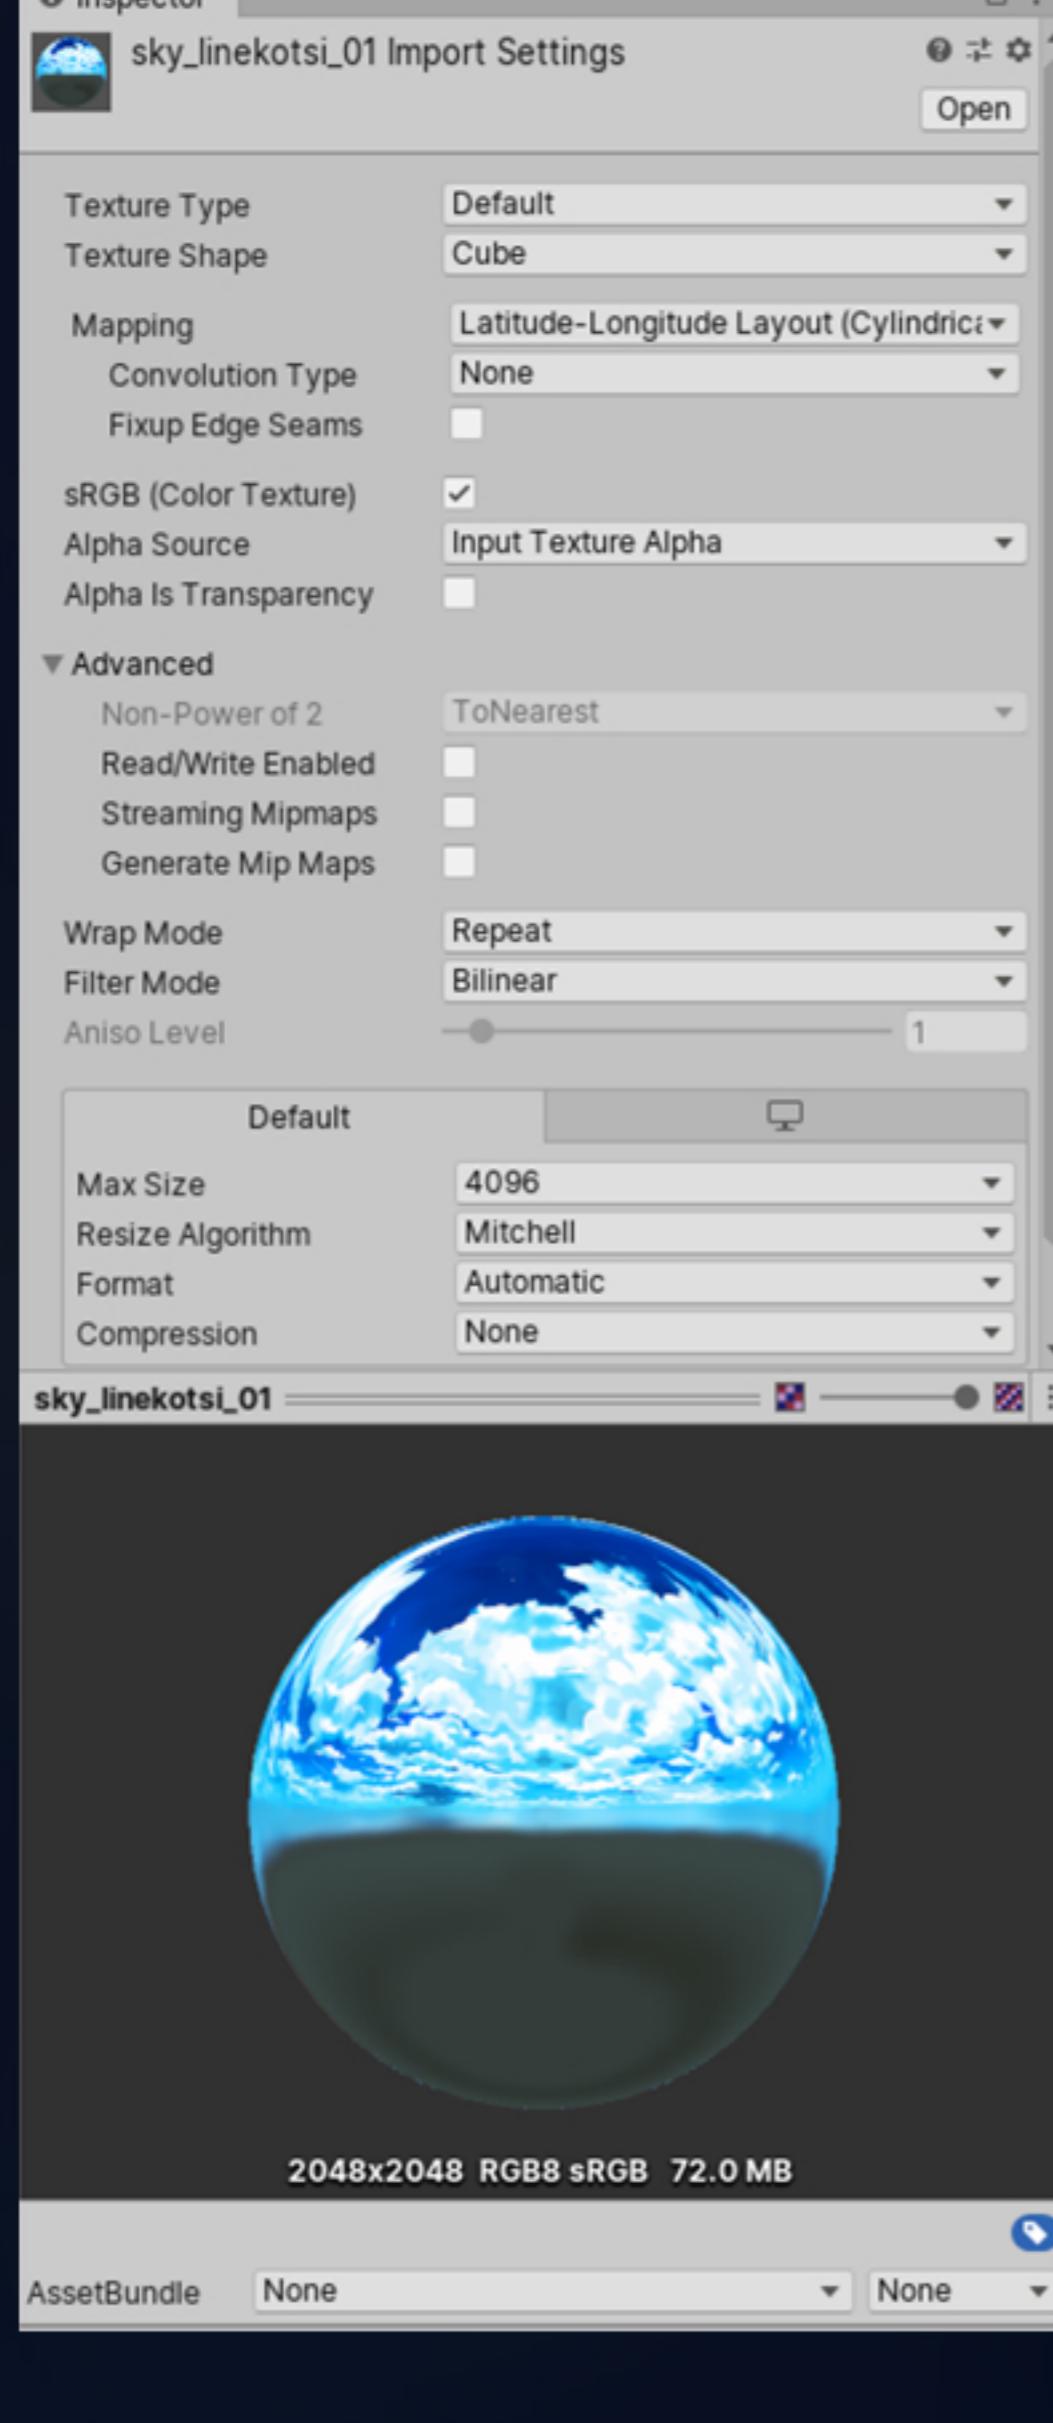

If you do enjoy use my skyboxes, please leave a review/rate/feedback on marketplace page, its will help me a lot!

At begin in a folder [Cartoon & Stylized HDRI sky Pack 01] you will see:

[HDRI_Files] - a folder that contain a HDR files. Better to use in advanced lighting and reflections or when you do want to make sure skybox do affect a light baking and produce nice looking baked light.

PNG - located in the root folder. Better to use it on low-end hardware ,because PNG files less heavy than HDR files.

At folder [Linekotsi>Cartoon & Stylized HDRI sky Pack 01] you can find HDRI images that are already setted as Cube Texture.

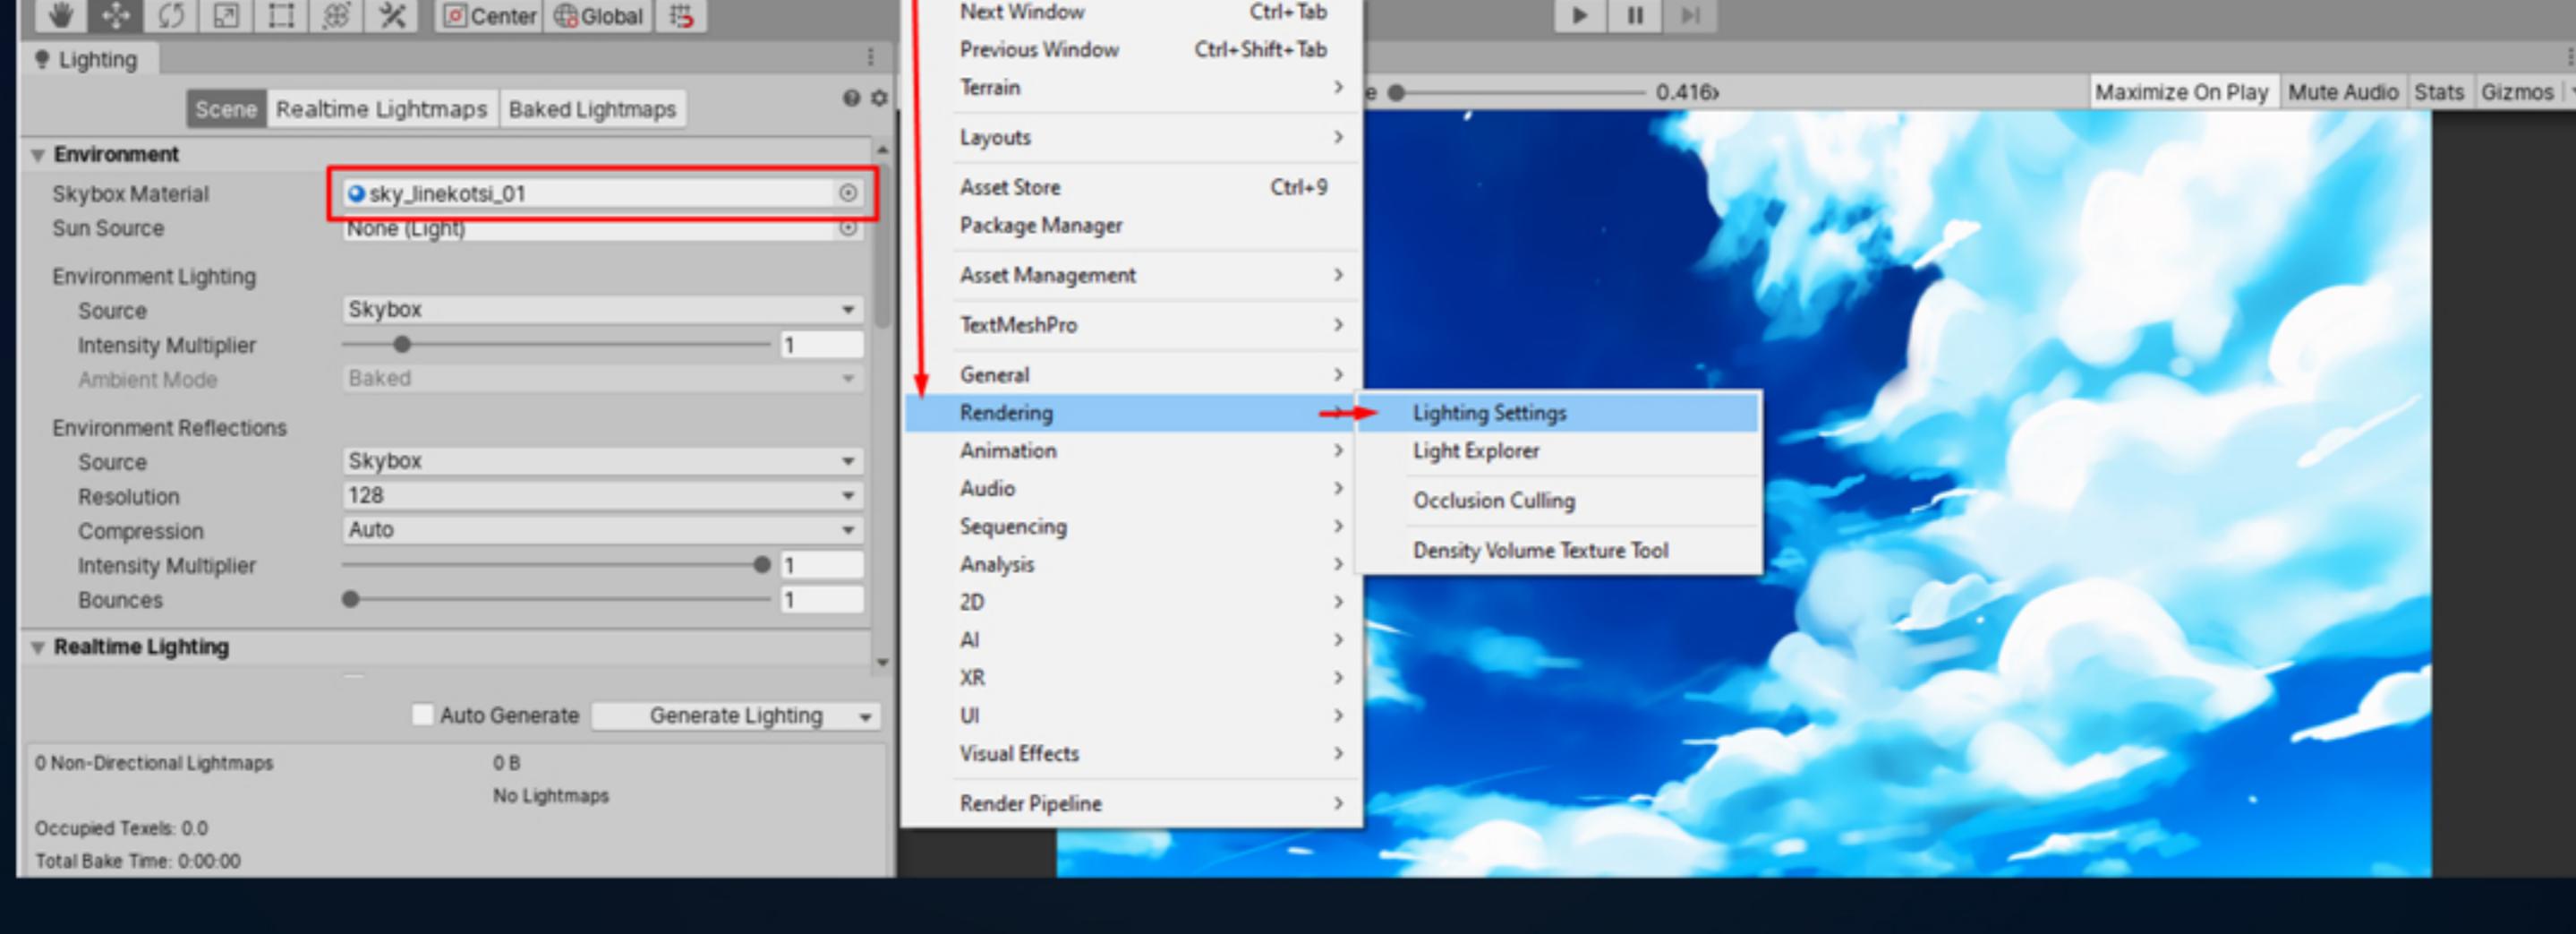

Recommended settings for HDRI sky.

By default Compression setted as None, for get the best quality of clouds, but you can change it to High Quality or Low Quality to reduce application weight on hardware storage.

Each skybox has a resolution 4096x2048 pixels.

Also if you want to use true HDRI sky, then use skybox from a folder called HDRI_Files for get most realistic reflections and baking light result.

If you are using standard built-in render or URP Pipeline - then check folder [LineKotsi\Cartoon & Stylized HDRI sky Pack 01\Standart_Render_Pipeline_Materials] , you can find here skybox material that you need to apply in lighting window.

Can I use it in any other software or real-time game engine?

Yes, most of softwares and real-time game engine do support both HDR and PNG files, but you need to setup them by your own, you can find many tutorials on youtube about "How to setup HDRI in your Software name".

Keep in mind that final texture import settings like compression and resolution is affect on quality and performance, so for games is better to use compression to save video memory, but for video production and rendering you can use higher resolution of image without compressions.

If you do have any questions, please contact with me via mail , make sure you do provide a invoice number to , so I can verify and provide support to you and I will respond you within few days: liyabohnat@gmail.com
